Armed with a microphone and tape recorder you've been sent to report on the opening of a brand new 3 star, [30 bedroom hotel in Ramsey](#) . It's a modern replacement for the now flattened Grand Island Hotel to the North along the bay. The wealthy developer is there along with civic dignitaries and the Chief Minister, who is also one of the two local MHKs.

You're anxious to talk some of these guests and after performing the official opening the Chief Minister grants you an interview. Proudly he tells you "This is a good example of government and the private sector working together, because government has a stake in this as well".

What's your next question?
